

# Sanipan MDF

Pre-drilled rear wall panel for wall-hung toilets

Sanipan MDF is a pre-drilled reinforcement panel, suitable as a rear wall panel for wall-hung toilets in dry lining construction. The pre-drilled openings in Sanipan MDF ensure quick installation and easy finishing. The finely sanded surface also ensures that the wall panel can be finished with tiles. The panel is cut to size and is suitable for wall-hung toilet systems. The high-quality and sustainable Sanipan panels are produced from 100% recovered wood. Sanipan MDF is a moisture-resistant MDF board suitable for use in humid conditions, service class 2.

## Applications

- Wall-hung toilets
- Dry-wall construction
- Service class 2
- Reinforcement panel

## Features

Pre-drilled for wall-hung toilets

Tileable

Fast and easy installation

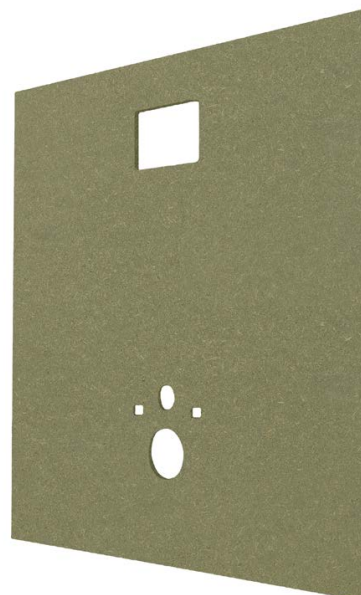

Humid conditions (service class 2)

Local reinforcement

100% recovered wood

# Sanipan MDF

## Applications

Sanipan MDF is a pre-drilled reinforcement panel, suitable as a rear wall panel for wall-hung toilets in dry lining construction. The panel is finished with a finely sanded surface, which makes the rear wall panel easier to finish with tiles. Sanipan MDF is in MDF class L.MDF.H and is suitable for use in dry and humid conditions, service class 1 and 2, where the relative humidity is limited to between 30 and 85% and in biological risk class 1 in accordance with EN 335-3. Please consult our installation manual on the website for further information on use and installation.

## Technical specification

General specification + standard	Unit	Value
Thickness EN 324-1	mm	18
Bending strength EN 310	N/mm <sup>2</sup>	18
Flexural rigidity EN 310	N/mm <sup>2</sup>	1,600
Internal adhesive strength EN 319	N/mm <sup>2</sup>	0.45
Swelling/24 hours EN 317	%	13

Sanipan satisfies the general requirements and is compliant with the formaldehyde emission category E1, as described in Table 1 of the EN 622-1 standard.

## 100% recovered wood

Sanipan MDF is made from 100% recovered wood: wood and wood waste that is no longer usable for someone else and we therefore save it from incineration. More specifically, Sanipan MDF is made from wood originating from residual flows from the wood industry and thinnings from sustainable forest management and roadside maintenance.

## Available dimensions and/or thicknesses

Sanipan MDF is available from stock. For technical options concerning other thicknesses and dimensions as well as minimum purchase quantities, please get in touch with our sales team or send an e-mail to [info.panels@unilin.com](mailto:info.panels@unilin.com).
