

TECHNICAL DATA SHEET

Material Specification:

Melamine faced wood based panel with decorative surface. HPL - high pressure laminate - consists of resin impregnated compressed paper layers. The substrate can be for both either Unilin Raw Chipboard or Unilin Raw MDF.

Area of application:

Decorative wood based panels for interior uses.

CLEANING AND MAINTENANCE INSTRUCTIONS

Due to their resistant and hygienic surfaces, Unilin Melamine faced products with melamine & HPL finish do not require any special maintenance. The surface is generally easy to clean; this also applies to textured surfaces.

The recommended cleaning methods are as follows:

GENERAL

The melamine & HPL surfaces can be cleaned several times a day with alcohol containing (70%) cleaning products without damaging it.

LIGHT/FRESH SOILING

Clean with a paper towel, a soft clean cloth or a sponge (dry or damp).

If using damp cloth, dry the surface with an absorbents paper towel or microfiber cloth.

NORMAL SOILING – EXTENDED CONTACT TIME

Clean with warm water, a clean microfiber cloth, a soft sponge or soft brush. For normal stains, use warm water mixed with all-purpose cleaner or window cleaner. Do not use too much water during cleaning. Preferably do not use a cleaning product that leaves a film (detergent). Then wipe with fresh water, removing all traces of cleaning agent, to prevent streaks forming. Dry the surfaces with a clean absorbent cloth or paper towel.

(VERY) STUBBORN/SPECIFIC SOILING

For stubborn stains, preferably use a spray of all-purpose cleaner or window cleaner directly on the stain, leave on for a few minutes and clean afterwards. The product should be spread directly onto the dirty spot during cleaning. For very stubborn stains, a miracle sponge can also be used by rubbing them over the surface with circular movements. For specific stains, industrial cleaners can be used depending on the type of stain. This should first be tested on a sample.

DO NOT USE ANY OF THE FOLLOWING CLEANING AGENTS:

- Abrasive, caustic, aggressive products (abrasive sponge, steel wool, abrasive paper);
- Floor cleaner, washing powder, furniture cleaner, abrasive, bleach, benzene, white spirit, solvents, descaling products;
- Detergents with strong acids and salts
- Steam cleaning equipment.
